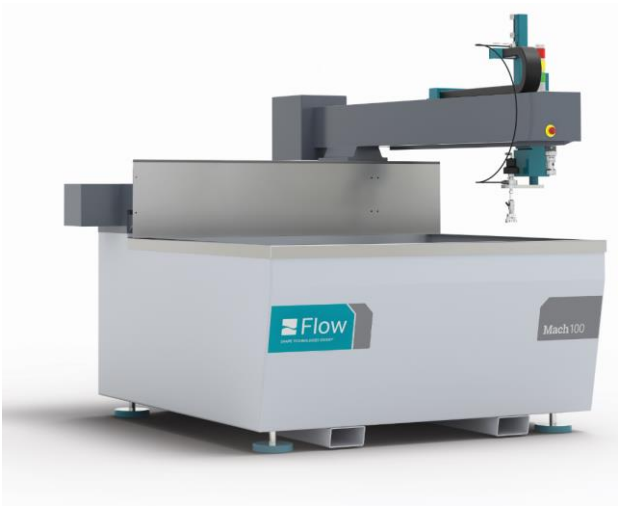
Flow - WaterJet Technology

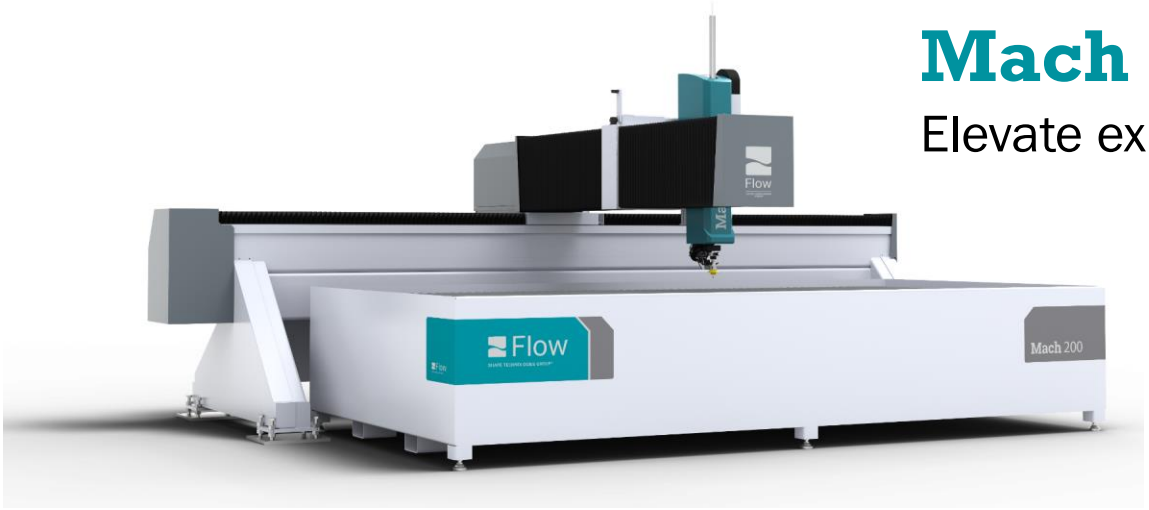
- Cut a variety of materials with just one tool
- No direct contact between the cutting head and the workpiece
- resulting in minimum lateral or vertical force
- Virtually no induced tension or micro cracks
- No heat distortion or heat-affected zones
- An environmentally clean process creating no toxic gases or fumes
- Efficient use for material thicknesses of up to 300 mm
- Part precision of up to ± 0.04 mm
- Drilling and cutting with the same tool
- Dynamic Waterjet Technology

Flow Systems



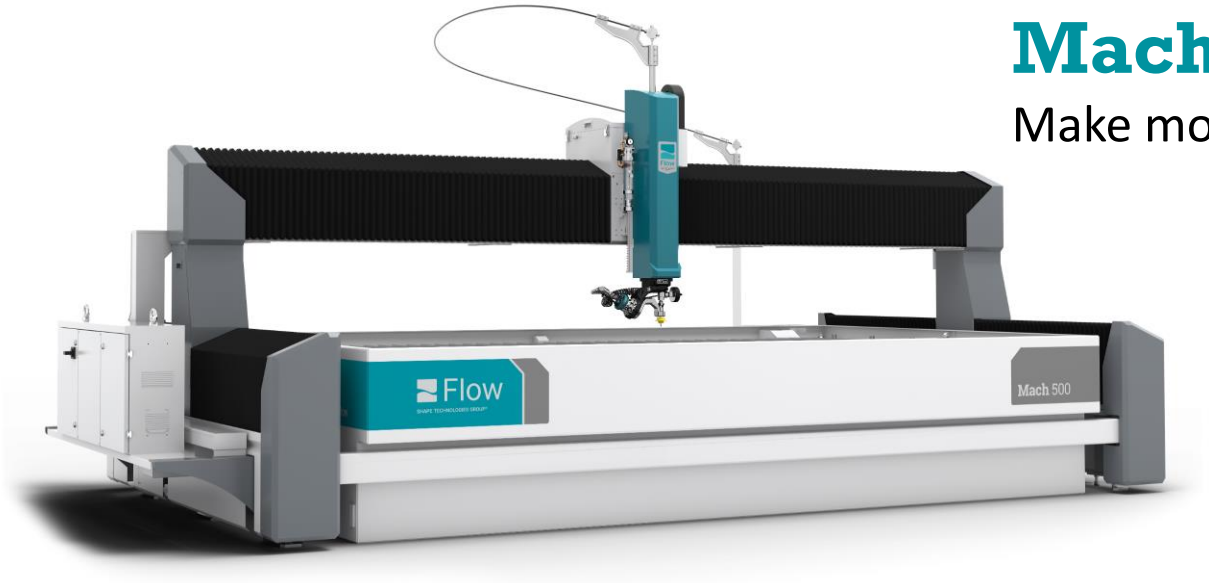
Mach *100*

Performance made affordable



Mach *200*

Elevate expectations.



Mach *500*

Make more.
